

RIJKO FERNANDEZ

ABOUT ME

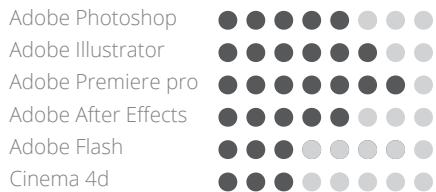

I'm a passionate **audio visual and motion design student** based in Utrecht. I love creating visuals that explores design, motion and culture driven stories that help contribute to the concept.

With a wide range of skills learned in school and personal projects, I have gained an insight in the creative - design processes and I'm capable to take on a variety of responsibilities in a project. This gives me the ability to work in smaller teams but also work independently if necessary.

Most of my projects I focus on concept development, research, and visualising.

SKILLS

01 Software

02 Social & professional
